

- *Minimized vibrations*
- *Efficient rotation*
- *Wind turbine optimization*

### Mass imbalances

Exceeding production or assembly tolerances

Unequal Rotor mass distribution  
(Rotor blade repair, lightning strike, material attrition...)

## *Providing All-In-One Solutions*

### Advantages/Benefits to Clients

- Reduced maintenance and repair costs
- Yield increase
- Higher availability
- Extended lifespan of machine components

### Aerodynamic Imbalance

Disparate blade angle adjustment  
Dissimilar aerodynamic rotor blade characteristics

Your worldwide partner for wind turbines!
